EXPERIENCE MAKES *the* DIFFERENCE.

HELPING INDIVIDUALS COPE. GIVING INDIVIDUALS HOPE.

Behavioral health is a medical specialty devoted to the diagnosis and treatment of mental disorders in adults. Patients are generally 18 or older and living with depression, anxiety, behavioral disorders or thinking disturbances.

Jennie Stuart Behavioral Health is a 12-bed inpatient unit that addresses the lifestyle adjustments, loss, physical challenges and medical issues that can result from the patient's condition. Our multidisciplinary team—nurses, psychiatrists, therapists, social workers and other team members—provides customized care in a secure, limited-access unit of the hospital.

HELPING PATIENTS AND THEIR CAREGIVERS.

An important component of our care delivery is providing support to families of patients. Our professionals counsel and train family members to help their loved ones make a safe, smooth transition back home after a stay at our hospital.

Jennie Stuart Behavioral Health has the expertise to diagnose and treat a wide range of behavioral health issues and improve the quality of life for both the patient and caregivers.

DAILY PROGRAMMING IS CUSTOMIZED AND MAY INCLUDE:

- Assessment of daily living skills
- Continuity of care and discharge planning
- Family support and consultation
- Group therapy
- Neuropsychological assessment
- Recreational therapy
- Specialized medical evaluation
